

Appendix 1: Additional Departmental Statistics

These statistics were taken from the Client Operation and Review System (CORS). The CORS database was the primary system of data collection from the time DCS became a separate entity in 1996 until CORS was replaced by the TN KIDS information system in the fall of 1999. On June 8, 1999, the Southeast region stopped using the CORS system and converted to TN KIDS. CORS does not contain Southeast region statistics for children coming into custody between June 8, 1999 and June 30, 1999. The numbers reported in all the tables and figures are totals reported as of June 30, 1999.
