HIT: Health Information Tennessee

**Monitoring the Health of Tennessee
(use "hitspot.utk.edu" to visit this site)**

HIT is a pilot project to disseminate data

- to identify population health problems and high risk groups, and
- to assess need for prevention, treatment, and rehabilitation services in Tennessee.

This is an official web site of the Tennessee Department of Health and The University of Tennessee, Community Health Research Group.

Be sure to visit SPOT and MAPS/GIS to fully utilize the innovative features of this interactive data site.

Browser Suggestions

The SPOT data analysis section of HIT is best viewed with Netscape(Free!).

At present Internet Explorer is not correctly processing the javascript which underlies the interactive map feature of SPOT. If you do use Internet Explorer then this will be detected by HIT whenever you navigate to or from a javascript enabled area such as SPOT. A warning box will appear asking that you read this explanatory file. Click on the OK button and proceed. You will still be able to view the maps, but the ability to click on an area of the map in order to make an area selection will not function. The selection boxes below each map are also dependent on javascript. All job submission and retrieval will work with Internet Explorer 3.0 or later. However, unless you are using Internet Explorer 4 or later, the automatic county identifier feature of SPOT, which is found in both the shaded map and county comparison plot outputs, will be disabled.

We are currently working on the Internet Explorer VBScript code that will parallel Netscape's JavaScript. Since Netscape is now free (as is Internet Explorer) and you can have both Internet Explorer and Netscape installed on your computer simultaneously we hope that you will be patient.
