## B. Health Information Tennessee (HIT)

The Tennessee Department of Health and The University of Tennessee Community Health Research Group developed Health Information Tennessee (HIT) a web site that was developed in conjunction with the Health Status Report of 1997 to make health related statistical information pertinent to Tennessee available on the Internet. This web site not only provides an assortment of previously calculated health and population statistics, but also allows users an opportunity to query various Tennessee health databases to create personalized charts and tables upon demand. The health data is continually being expanded and updated. You may visit this web site at the following address [hitspot.utk.edu](http://hitspot.utk.edu).

---

◆ For more information about the Community Diagnosis assessment process, please contact council members or the East Tennessee Health Assessment and Planning Staff at (423) 546-9221.
